HOSEI UNIVERSITY FACT BOOK

Continue to challenge conventions without fear of change

In 1880, Hosei University was founded with the power of youth in an era when the atmosphere aimed at freedom was at its height. Over the three centuries since its foundation, Hosei University has educated human resources in the culture of liberty and progress. Continue to challenge conventions without fear of change – Hosei University pursues continuous innovation instead of complacency as evidenced by its history and traditions.

Culture of Hosei University **Liberty and Progress**

Root of the foundation of Hosei University

Tokyo Hogakusha (Tokyo School of Law) was born in 1880, when the penal code and criminal law were promulgated as forerunners of modern Japanese law. The Tokyo School of Law was established by Kanamaru Magane, Ito Osamu, and Satta Masakuni and other young lawyers in response to the trends of the time in Japan that saw a national upsurge in the movement for individual freedoms and ongoing development of the modern legal system. The school had both Kohokyoku, where lectures on law were given, and Daigenkyoku, where on-the-job training for lawyers was given. This shows that the spirit of on-the-job training and career education was present at the foundation of the school and has been its legacy to date.

KANAMARU Magane
1852–1909

ITO Osamu
1855–1920

SATTA Masakuni
1856–1897

Wise men established the basis of our tradition and culture

established the foundation for modern Japanese law

Gustave Emile BOISSONADE
1825–1910

Dr. Boissonade came to Japan from France as a legal advisor to the government of Japan. He became the director of the Tokyo School of Law in 1883 and laid the groundwork for the school by volunteering to teach students for ten years. The basic philosophy of modern law, similar to that of French natural law, was thus established by Dr. Boissonade, who formed the foundation for Hosei's culture of liberty and progress.

father of Japanese civil law

UME Kenjiro
1860–1910

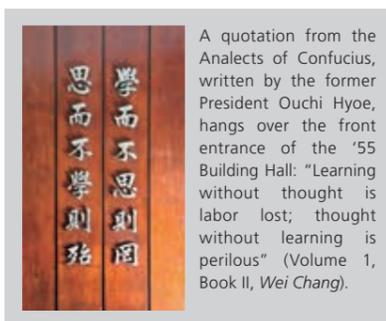

Dr. Ume Kenjiro, called the "father of civil law" in Japan, became the first president of Hosei in 1903. Dr. Ume promoted multi-faceted educational reforms from a global perspective, including the establishment of the Department of Expedited Law Training for Chinese students and the Department of Language Studies for language training in English, German, and French. This spirit of an open education has also been its legacy.

Dramatic development in the post-WWII period

After Ouchi Hyoe became the president in 1950, he reconstructed the school buildings that were destroyed in World War II. He constructed '53 Building (present Boissonade Tower), '55 Building, and '58 Building, and made substantial contributions to the dramatic development of Hosei University in the post-WWII period. Some policies of Ouchi in this support development period have been inherited, including *develop independent and free human resources* (signifying freedom in the Hosei culture) and *develop useful talents who take a concrete step, no matter how small, for improving and enhancing the social life of Japanese people, instead of asserting vain theories* (signifying progress in the Hosei culture).

OUCHI Hyoe
1888–1980

A quotation from the Analects of Confucius, written by the former President Ouchi Hyoe, hangs over the front entrance of the '55 Building Hall: "Learning without thought is labor lost; thought without learning is perilous" (Volume 1, Book II, Wei Chang).

- 1880 Tokyo Hogakusha (Kohokyoku and Daigenkyoku) was founded by the non-governmental lawyers Kanamaru Magane and Ito Osamu in Surugadai, Tokyo.
- 1881 Kohokyoku spun off from Tokyo Hogakusha and became the Tokyo School of Law headed by Satta Masakuni.
- 1883 Dr. Boissonade, a professor (agregé) at the University of Paris, was invited as a legal advisor to the government of Japan and became the director of the Tokyo School of Law.
- 1886 Tokyo Futsu Gakko (Tokyo School of French Studies) was established by Futsugakkai (later Societe Franco-Japonaise).
- 1889 The Tokyo School of Law merged with the Tokyo School of French Studies and became Wafutsu Horitsu Gakko (Tokyo School of Japanese and French Law). Dr. MITSUKURI Rinsho became the principal who advocated an academic culture based on freedom and innovation.
- 1903 Pursuant to the Vocational School Order, the Tokyo School of Japanese and French Law was renamed the Tokyo School of Japanese and French Law, Hosei University. Preliminary courses, undergraduate faculties, specialized courses, and graduate schools were established. Dr. Ume Kenjiro became the first president.
- 1915 The baseball team was established. The team joined the Big 4 Baseball League in 1917. The Tokyo Big 6 Baseball League was founded in 1925. The Hosei University Baseball Team won the Tokyo Big 6 Baseball League championship for the first time in the fall of 1930 and has since contributed to Japanese baseball as a prestigious team.
- 1920 Pursuant to the University Order, the establishment of private universities was authorized for the first time. The Tokyo School of Japanese and French Law, Hosei University, became Hosei University. The Faculty of Law and the Faculty of Economics were established. Hosei became one of the largest private universities in Japan with preliminary courses, specialized courses, and the Graduate Schools of Law and Economics.
- 1921 Hosei University moved to a new school building at 4-chome, Fujimicho, Kojimachi Ward (the present Ichigaya Campus).
- 1922 The Department of Letters and the Department of Philosophy were established in the Faculty of Law, and the name was changed to the Faculty of Law and Letters.
- 1944 Hosei University Aviation Industry Technical School was founded, the predecessor to the Faculty of Engineering.
- 1947 The Faculty of Law and Letters separated into the Faculty of Law and the Faculty of Letters. With the Faculty of Economics, Hosei University now had three faculties. Correspondence education started in July.
- 1949 In line with the School Education Law, Hosei University reorganized under the new university system.
- 1950 Ouchi Hyoe became the president. The Faculty of Engineering was established.
- 1951 Pursuant to the Private School Law, Hosei University became a legally recognized private university. Graduate schools were established under the new system.
- 1952 The Faculty of Social Sciences was established.
- 1959 The Faculty of Business Administration was established.
- 1962 The Hosei University scholarship system was established.
- 1964 The Koganei Campus was completed, and the Faculty of Engineering moved to the new campus.
- 1977 The International Center (now the Global Education Center) was established.
- 1979 The scholarship study abroad system (now the dispatched study abroad system) started.
- 1980 Hosei University celebrated its 100th anniversary.
- 1984 The Tama Campus was completed. Classes started for first-year students in the First Division, Faculty of Economics, and the First Division, Faculty of Social Sciences.
- 1992 The '92 Building (Graduate School Building) was completed.
- 1999 The Faculty of Intercultural Communication and the Faculty of Humanity and Environment were established.
- 2000 The Faculty of Social Policy and Administration and the Faculty of Computer and Information Sciences were established. The Boissonade Tower was completed on the Ichigaya Campus. Hosei University celebrated its 120th anniversary.
- 2003 The Faculty of Life-long Learning and Career Studies was established.
- 2007 The Faculty of Engineering and Design was established.
- 2008 The Faculty of Science and Engineering, the Faculty of Bioscience and Applied Chemistry, and the Faculty of Global and Interdisciplinary Studies (GIS) were established.
- 2009 The Faculty of Sports and Health Studies was established.
- 2010 Hosei University celebrated its 130th anniversary.

Hosei College Song

Words by Haruo Sato, music by Hidemaro Konoe

- 一、若きわれらが命のかぎり
ここに捧げて (ああ) 愛する母校
見はるかす窓 (の) 富士が峰の雪
堂集めむ門の外濠
よき師よき友つどひ結び
法政 おお わが母校
法政 おお わが母校
- 二、若きわれらが命のかぎり
ここに捧げて (ああ) 愛する母校
われひと共にみとめたらずや
進取の気象質実の風
青年日本の代表者
法政 おお わが母校
法政 おお わが母校

School colors

Hosei University's school colors are orange and deep blue (Hosei blue). According to an old cheering song, orange and Hosei blue respectively represent the sun at dawn and the blue sky. Hosei blue is a bluish purple, deeper than purple.

Logo

This logo was determined in 2013. The "H" symbolically expresses the energetic roles of Hosei University in various fields. The design shows Hosei's power to continuously challenge conventions, the possibility and flexibility achieved through such challenges, and the resulting expansion.

School badge

The present school badge was determined in 1930, conceptualized by Professor YAMAZAKI Seitaro of the preliminary courses (he was also a researcher and critic of Nogaku under the pseudonym Gakudo). The kanji characters "大" and "学" are designed into a young tortoise, symbolizing long tradition and permanent truth.

List of Undergraduate Faculties and Graduate Schools

++ Undergraduate Faculties

Faculty	Department	Degree	Campus Location
Faculty of Law	Department of Law	Bachelor of Arts (Law)	Ichigaya

Research Institutes

Advanced special research and study institutes have made numerous achievements

Hosei University has affiliated research institutes in a variety of different fields, and those institutes have made numerous achievements. The achievements in research and study activities at those institutes are presented at academic conferences, symposiums and lectures, or published as reports.

The Nogami Memorial Noh Theatre Research Institute

This is a comprehensive research institute for Japanese nōgaku. The institute was founded in 1952 to commemorate the accomplishments of a former president of the university, Dr. Toyochirō Nogami. The institute houses approx. 40,000 materials related to nōgaku (including important cultural properties), one of the largest collections in Japan. The institute undertakes activities to develop research in nōgaku and promote noh theater.

http://nohken.ws.hosei.ac.jp/index_en.html#

Institute for Okinawa Studies

This institute was established for comprehensive comparative studies of the cultures, histories and languages in Okinawa and the Ryukyu Islands, China, East Asia, and Southeast Asia. At present, the institute functions as an information network center that links researchers in Japan and overseas in response to the global expansion of Okinawan studies.

<http://www.hosei.ac.jp/fujimi/okiken>
(Japanese pages only)

The Ohara Institute for Social Research

This institute undertakes research and studies of social and labor issues and is known as a private institute with the longest history in the social sciences field.

<http://oisr-org.ws.hosei.ac.jp/english/>

Research Center of Ion Beam Technology

This rare institute of a private university has two ion accelerators, which are used for the research and development of IC manufacturing technologies and next-generation communication equipment.

<http://www.ionbeam.hosei.ac.jp/en/instruments.html>

Research Center for Computing and Multimedia Studies

This center focuses on the research and development of IT-related fields, including IT-intensive computing sciences and media-intensive educational systems.

<http://www.media.hosei.ac.jp/?lang=en>

Sports Research Center

This center was established to promote sports and physical education and explores the new research areas of the integration of sports and physical education and of health science and welfare engineering.

<http://www.hosei.ac.jp/taiku/rpes.html>
(Japanese pages only)

Japan Statistics Research Institute

This unique research institute specializes in statistics, which is rare in Japan. The institute has published many research articles and reports through joint research with other universities and governmental statistical agencies.

<https://www.hosei.ac.jp/toukei/english/01/about/index.html>

Institute of Comparative Economic Studies

This institute was established in 1984 for international economic research and studies with a focus on comparisons between Japan and other countries.

http://www.hosei.ac.jp/ices/index_e.html

Center for Regional Research

As a base for studying regional issues from a global perspective, this center provides support and policy proposals to the central government, municipalities, business enterprises, and other agencies.

<http://www.hosei-hurin.net/eng/index.html>

Research Center for International Japanese Studies

This center was founded as the first research institute in Japan to establish an international Japanese studies program. At present, a new research system will incorporate the branding project of Hosei University with environment, region, and climate as key words.

<http://hijas.hosei.ac.jp/Default.aspx?tabid=331>

Research Center for Micro-nano Technology

The objective of this center is to contribute to the conservation of the global environment undertaking research in the fields of energy, bioscience, electronics, and mechatronics.

<http://www.hosei.ac.jp/nano/en/index.html>

Boissonade Institute of Modern Law and Politics

This institute collects literature and materials concerning Dr. Gustave Boissonade, who is known as the father of modern law in Japan and who made a substantial contribution to Hosei University in its early period. At this institute, research projects focus on issues that are difficult to resolve through conventional legal approaches.

http://gendai-hou.ws.hosei.ac.jp/index_eng.htm

Research Activities

At present, over 200 professors and instructors from a number of different countries can be counted among the teaching faculty. Each year, there are approximately 30-40 visiting professors and researchers whose duration of stay lasts 2 months to a year.

HIF Foreign Scholars Fellowship

Invitations are extended to young scholars from abroad, who are at the very minimum enrolled in a doctoral program, to apply to the HIF Fellowship Program to carry out non-degree research programs at Hosei University under the direction of and/or in cooperation with Hosei faculty and researchers. Research areas include those studies in the humanities, social or natural sciences, or engineering, as deemed acceptable by Hosei.

Some scholars are invited for 6-12 months each year according to the terms of the program. The grantees receive a monthly stipend and all/part of economy class transportation expenses for travel to and from Japan. The HIF fellow also will be provided with shared office space, a PC, and a Hosei University network ID.

<http://www.hosei.ac.jp/en/researchers/>

International Students

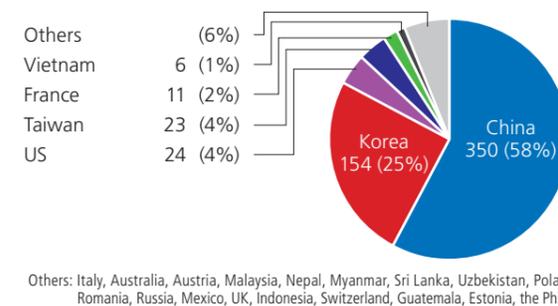

The acceptance of international students goes back to the Meiji Era (1868-1912) with the arrival of the first students from China during the Ching Dynasty. Hosei University takes pride in its long history of matriculating and graduating exceptional international students. Currently over 500 international students from around the world are enrolled at Hosei University.

These international students can be classified into two groups: 1) regular degree candidate students who have passed the Special Entrance Examination for International Students and 2) short-term exchange students who are enrolled for 6 months to one year. In general, short-term exchange students are sponsored by overseas universities that have mutual exchange agreements with Hosei University, but some privately sponsored students can also be accepted.

1,097 students

*Results in FY 2016
*Total of international students in faculties, graduate schools, and short-term acceptance programs

Top Global University Project

Hosei University was selected for the Super Global Universities program by the Ministry of Education, Culture, Sports, Science and Technology. However, globalization is not the objective of our education program. Hosei University aims to help students develop practical skills to resolve the various issues that interfere with liberty and progress in the world by learning and leveraging global skills through multicultural symbiosis and viewpoints for understanding others.

Five goals of international education

1	2	3	4	5
Educate leaders able to survive in any part of the world	Gather human resources capable of formulating a sustainable society and strengthen their presence on the world stage	Support secondary education to establish the basis for a sustainable global society	Help working people continue their education for contributing to the establishment of a sustainable global society	Establish a system that promotes and helps rapid response to and decision-making based on changes in the global society

To attain these goals, diverse educational programs are provided

Students can acquire skills that can be globally leveraged while studying in Extracurricular Problem – solving fieldwork activity	Increased opportunities for studying abroad	Further globalization of campuses
<p>Key initiatives</p> <ul style="list-style-type: none"> The number of classes not conducted in Japanese has increased to 10% at the entire university Programs have opened in which students can study and graduate using English only High language proficiency is developed through English Reinforcement Programs (ERPs) and enhanced specialized and related subjects taught in English A subject group looking toward a sustainable society has been established to motivate students who can contribute to a sustainable society Problem-solving classes opened for international students to study and work in the field together with Japanese students 	<p>Key initiatives</p> <ul style="list-style-type: none"> Credit courses have been enhanced and include the a cross-the-board dispatch student program and individual faculty study abroad programs Overseas partner schools will increase from 194 to 250 universities/institutions International volunteer and internship programs have been enhanced 	<p>Key initiatives</p> <ul style="list-style-type: none"> Attract 3,000 international students through diversified entrance exam systems and new degree courses offered in English only Enhance international student dormitories and other facilities Reform entrance exam systems for advanced globalization, including an entrance exam based on the International Baccalaureate Program

Specific visions for international education

In order to actually develop leaders who can survive in any part of the world, as well as global leaders with a well cultivated personalities, Hosei University has specified and promoted the following numerical targets.

Participation in global activities 100%	Study abroad with credits 1,500 students	Share of CEFR B1 (equivalent to TOEFL® ITP 500) 48.1%	Degree courses using English only 7	Collaborative high schools (in Japan and overseas) 110	Recurrent programs 1,200 students	Share of international faculty members 60%
---	--	---	---	--	---	--

What is the Top Global Universities project?

This is a part of the Top Global Universities project's promoted by the Ministry of Education, Culture, Sports, Science and Technology to provide intensive support to universities that promote fundamental internationalization and internal reforms for stronger international competitiveness in higher education in Japan. Selected universities include prestigious schools that undertake the world highest level of research and education and schools that lead

internationalization through innovative attempts. Hosei University seeks to help students develop practical skills and leadership competencies that can be leveraged globally so that students can maximize, in a global society, the skills accumulated through our interesting programs under the project concept of "Create a global university that conceptualizes a sustainable society led by Japan as an advanced problem-solving country."

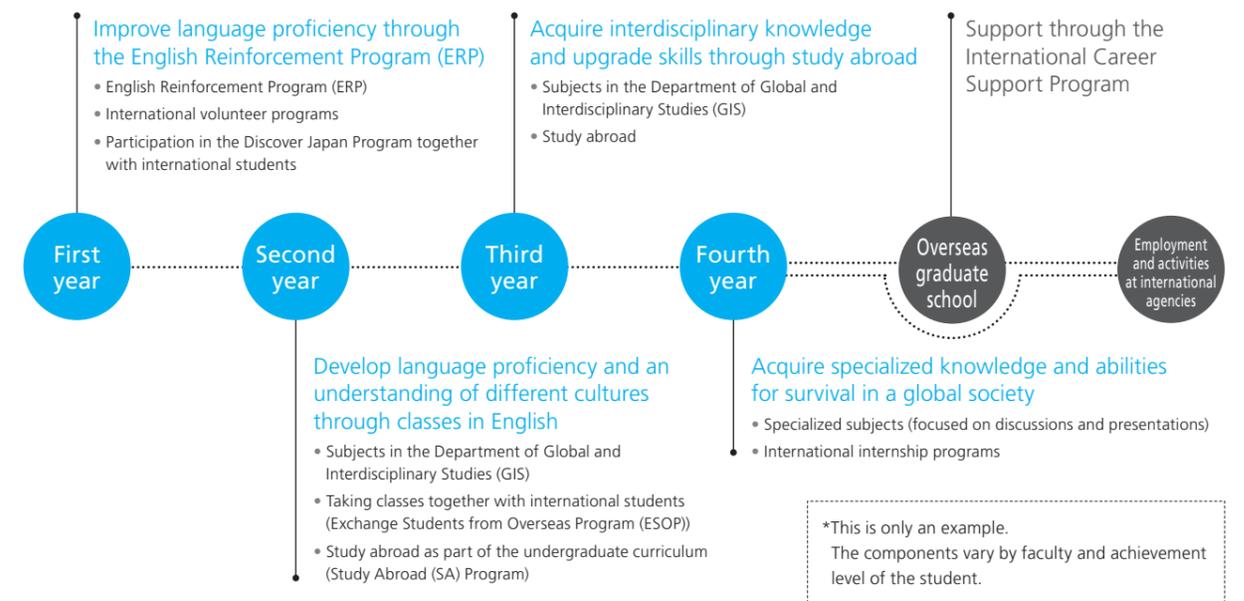

International Programs

Developing global leaders with rich personalities through interesting programs

Hosei University was selected for the Project for Promotion of Global Human Resource Development by the Ministry of Education, Culture, Sports, Science and Technology. This project is operated by the Global Education Center at Hosei, which deploys interesting programs to allow students to gradually upgrade skills from their first year and use such skills in practice, including improvement of language proficiency, understanding of different cultures, and enhancement of global practical skill.

Example of global human resource development

Example Ms. A, Department of Business Strategy, Faculty of Business Administration
I have basic English skills and want to specialize in business strategy while acquiring advanced English proficiency in order to find employment in an international agency.

English Reinforcement Program (ERP)

This program is for students who have English proficiency of TOEFL® iBT 39 (equivalent to PBT/ITP 430) or higher and are highly motivated to study English. The ERP classes are held on all campuses and can be taken free of charge between other classes. The program allows students to efficiently acquire practical English skills. The classes are taught in English in an interactive style in small groups. Students can acquire the four skills of English (listening, speaking, reading, and writing). The classes that emphasize skill integration allow students to steadily develop effective English proficiency with a balance of all four skills.

Subjects planned for FY 2017

Skill subjects <ul style="list-style-type: none"> Reading and Writing Oral Presentation and Discussion TOEFL® Preparation Academic Writing and Presentation/Discussion Business English (including Presentation, Negotiation) Advanced (Essay) Writing and Discussion 	<ul style="list-style-type: none"> Oral Interaction Paragraph Reading and Writing Academic Reading and Writing 	<ul style="list-style-type: none"> Listening and Discussion Essay Writing and Oral Presentation Academic Presentation and Discussion Media English Critical Reading and Writing
Applied subjects <ul style="list-style-type: none"> Instagram English 	<ul style="list-style-type: none"> Advanced Academic English 	<ul style="list-style-type: none"> Tokyo in Time

| Global Lounge

The Global Lounge lets students acquire practical language skills on campus through opportunities for daily communication with native speakers of English and international students. Each of the three campuses has a Global Lounge, and service is available throughout business hours. The lounge also functions as the receiving office for ERP and international volunteer and internship programs; full-time personnel respond to inquiries and provide consultation services. Native speakers of English wait for students as English Study Advisors and respond to student requests for ideas on how to advance in English and to learn about foreign cultures.

| International volunteer and internship programs

Students acquire international perspectives and skills by looking at the world in new ways through a variety of different experiences. There are two programs: international volunteers, where students contribute to the international community together with participants from many different countries and regions, and international internships, where students are sent to work at business enterprises and NGOs. These programs help students meet the challenges overseas by learning about different cultures, languages, and working styles.

International volunteer and internship programs in FY 2016

- International work camps in Asian countries and different parts of Japan
- On-the-job training at a local company in Vietnam
- On-the-job training in a project to support farmers in the Philippines
- On-the-job training at a municipality and NPO in Romania
- On-the-job training at a Japanese corporation in Malaysia
- On-the-job training in Japanese language and culture education at a U.S. university

| Japanese Language Program (JLP)

Hosei university has accepted students from overseas for many decades to develop the university's international activities.

For a more progressive globalization, we mainly deliver JLP for the followings:

- Exchange Students from Overseas Program (ESOP) students
- English-based Degree Program students
- Non-degree Seeking students who have N4 level or higher of the Japanese-Language Proficiency Test (JLPT)

Non-degree students mentioned above study Japanese language for one-semester or two-semester intensively by various classes for intermediate and advanced learners.

JLP also, as one of objectives, focuses on attaining Japanese proficiency required for both undergraduate and graduate program, as well as business in future career.

Our educational goal is to develop internationally competent students capable of communicating in Japanese and contributing to a global society.

We open our door to any foreign students who are eager to learn Japanese language and culture at a university in Japan.

HOSEI UNIVERSITY ESOP

| Exchange Students from Overseas Program (ESOP)

The HOSEI University Exchange Students from Overseas Program (ESOP) is an independent academic program administered under HOSEI University International Office. Although ESOP is independent of HOSEI University's regular faculty system, both professors and students from the regular faculties teach and study in ESOP sponsored classes, and ESOP is an integral component in HOSEI University's international cooperation efforts. ESOP was established in 1997 in order to provide meaningful academic opportunities to exchange students, from our overseas partner institutions as well as individual applicants, who wish to experience the reality of modern Japan.

| Curriculum

ESOP courses taught in English is specialized to learn Japanese society. English Medium Courses about Japan are available to regular HOSEI University students as well, which enables exchanges with Japanese students. Many classes are taught in a seminar-style format and feature small class sizes.

ESOP Exchange Students from Overseas Program

| Student Support

HOSEI University International Office provides various types of support in the following areas to help exchange students get the most out of their time as students in Japan.

Daily life in Japan	procedures at ward office, opening of bank accounts, National Health Insurance, student wellness, scholarships etc.
Language buddy	exchange students are paired with HOSEI University students, enabling them to teach their native languages to each other.
Japanese culture experience	provide opportunity for communicate with Japanese educational facilities, and many chance to participate event which can experience Japanese culture.

Hosei University English-based Degree Programs

Since 2008, when Hosei University established the Faculty of Global and Interdisciplinary Studies(GIS), offering bachelor degrees in the liberal arts taught completely through the medium of English, the university has been at the forefront of global education. Now, to increase the number of students we are able to accept from overseas, Hosei University is taking the initiative and expanding its English-based degree programs as follows:

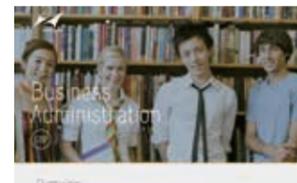

- Global Business Program (GBP) from September 2016
 - Sustainability Co-Creation Programme (SCOPE) from September 2016
 - Institute for Global Economics and Social Sciences (IGESS) from September 2018
 - Global MBA Program from September 2015
 - Institute of Integrated Science and Technology (IIST) from September 2016
- To learn more about our innovative programs, please see the following links:

I Undergraduate

■ Global and Interdisciplinary Studies (GIS)

Global transformations have revealed the need today to move beyond traditional frameworks of national, ethnic, and regional thinking. Focusing on a variety of social and political challenges confronting contemporary society, the program at GIS seeks to cultivate a truly global perspective, developing innovative ways to both analyze and engage with the shared experiences of an increasingly interdependent world.

■ Global Business Program (GBP)

Hosei University will establish a new course of study from 2016. Its foundation is based on the objective of developing human resources adaptable for the management of globalized business in the 21st century – often referred to as “The Asian Century”. This course will be conducted in English, and offers the opportunity to study the real life practices of Japanese corporations engaged in global business management.

■ Sustainability Co-Creation Programme (SCOPE)

Hosei University, The Faculty of Humanity and Environment will establish a new academic course called “SCOPE” from Fall 2016. The SCOPE “Sustainability Co-Creation Programme” has as its objective to develop “GLOCAL (global + local)” human resources. The “GLOCAL” human resources are those who can command both global and local points of view respectively, and with which they lead to the creation of a sustainable society.

■ Institute for Global Economics and Social Sciences (IGESS)

IGESS stands for Institute for Global Economics and Social Sciences – a facility scheduled to open in September 2018 offering English-based degree programs on Hosei University’s Tama Campus. All liberal arts and major subjects will be taught in English, with graduates earning bachelor’s degrees in economics. IGESS is intended to support the development of globally-minded experts in economics and social sciences toward the formation of a sustainable society.

I Graduate

■ Global MBA Program

There is a small country tucked away in the corner of Asia whose strengths we want today’s young generations to learn from. The name of that country is Japan. In that country, HOSEI University has established a new MBA program for today’s global

■ Institute of Integrated Science and Technology (IIST)

Institute of Integrated Science and Technology (IIST), a graduate program for studying integrated science and technology in English, which supports a sustainable global society, will be established at the Graduate School of Science and Engineering and the Graduate School of Computer and Information Sciences, Hosei University.

Exchange program and Year abroad program

Exchange program

Regardless of the faculty, applicants in the second and third years are selected, and the selected students are dispatched for about one year in their third and fourth years to 49 universities in 18 countries and regions that have concluded agreements with our university. A scholarship of 700,000 to 1,000,000 yen is provided to all exchange students, and the students are exempted from the tuition at the participating university (note that the tuition for the year of study abroad is paid to Hosei University). Up to 30 to 60 credits (varies by faculty) that the students acquire at the participating university are recognized as part of the graduation requirements for Hosei University through deliberations at a faculty meeting. Detailed support is provided by personnel from the International office from the preparatory process until students complete the study abroad experience and return to Japan.

■ Year abroad program

When students in the second or higher year study abroad for one year at their own expense at a foreign university that satisfies the specified requirements, up to 30 to 60 credits (varies by faculty) that they acquire at the participating university are recognized as part of the graduation requirements for Hosei University through deliberations at a faculty meeting. The study abroad period is included in the minimum period required for graduation. There is also a system where a scholarship of up to approximately 900,000 yen is provided.

Faculty-specific study abroad programs and overseas training programs

Faculty-specific Study Abroad (SA) programs are incorporated into the curricula at the Faculty of Letters (Department of English), Faculty of Business Administration, Faculty of Intercultural Communication, Faculty of Lifelong Learning and Career Studies, Faculty of the Global and Interdisciplinary Studies (GIS), Faculty of Economics, Faculty of Social Sciences, Faculty of Science and Engineering, and Faculty of Bioscience and Applied Chemistry. Training programs appropriate for the faculty curricula are also available, including the Hosei Oxford Programme (short-term training at the University of Oxford for students of the Department of Global Politics, Faculty of Law) and overseas training in Sweden or other countries with advanced social welfare programs for students of the Faculty of Social Policy and Administration. The Faculty of Social Sciences recognizes credits acquired during short-term study abroad programs during the spring or summer vacation.

List of study abroad programs and overseas training programs

Faculty & Program	Scope/eligibility	Participants in 2016	Participating countries (select one)	Period
Faculty of Law Hosei Oxford Programme	All students of Global Politics Several students of Law and of Political Science	160	University of Oxford, UK	Approx. 2 weeks in the summer vacation
Faculty of Letters (Department of Philosophy) International Philosophy Special Course	Applicants in the second to fourth years of Philosophy (When applicants exceed the capacity of 20 students, a selection is required)	15	France	1 week
Faculty of Letters (Department of English) SA Program	Applicants in the first to fourth years of English (internal selection is required)	10	Ireland	3 weeks in the summer vacation
	Applicants in the second to fourth years of English (internal selection is required)	7		Approx. 3 months in the fall semester Approx. 7 months in fall semester
	Applicants in the 1st to 4th years of English (internal selection is required)	4	USA	Approx. 4 months in the fall semester Approx. 7 months in the fall semester
Faculty of Business Administration SA Program	Capacity: approx. 30 students (faculty selection is required)	22	USA, Australia	Approx. 3 to 4 months in the fall semester of the second to fourth years
Faculty of Intercultural Communication SA Program	All faculty students should study abroad (see the footnote* for international students)	226	UK, USA, Australia, Canada, Switzerland, France, Russia, China, Spain, South Korea	Long-term: approx. 3 to 5 months in the fall semester of the second year
		6	USA	Short-term: approx. 5 weeks in the summer vacation of second year
Faculty of Humanity and Environment Overseas Field Study	Applicants (faculty selection is required)	76	Australia, Southeast Asia, China, Europe, etc. ** Varies by academic year	Approx. 10 to 14 days in the summer or spring vacation
Faculty of Lifelong Learning and Career Studies SA Program	Capacity: 10 students (up to 5 students for each country; faculty selection is required)	10	Australia, New Zealand	Approx. 3 months in the fall semester
Faculty of Global and Interdisciplinary Studies (GIS) Overseas Academic Study Program	All applicants (requirements of the participating organization should be satisfied)	4	USA, Canada, UK	4 to 5 months
			New Zealand	4 or 10 months
Faculty of Economics SA Program	Capacity: approx. 60 to 100 students (faculty selection is required)	54	USA, UK, Australia, Canada * Varies by academic year	Approx. 4 months in the spring semester of the second year
Faculty of Social Sciences SA Program	Applicants (faculty selection is required)	12	USA, Canada, China	Half-term: 3 to 5 months in the fall semester in the second or third year Long-term: approx. 8 months in the third year (Canada only)
Faculty of Social Sciences Short-term Study Abroad Program	Students who are enrolled for Elementary German A/B or for Elementary French A/B	2	Germany, France	Spring vacation in 1st to 3rd year Summer vacation in the second to fourth years
Faculty of Social Policy and Administration Overseas Training System	Faculty: 30 students (faculty selection is required)	26	Sweden, etc.	Approx. 10 days in the summer vacation in the second year
Faculty of Sports and Health Studies Overseas Extracurricular Training	Capacity: 22 students (faculty selection is required)	22	USA	2 weeks in the summer vacation in the second or third year
Faculty of Science and Engineering Study Abroad Program	Capacity: approx. 30 students	6	USA	4 weeks in the summer vacation
	Capacity: approx. 25 students	10	Ireland	4 weeks in the spring vacation
Faculty of Bioscience and Applied Chemistry Study Abroad Program	Capacity: approx. 30 students	3	USA	4 weeks in the summer vacation
	Capacity: approx. 15 students	11	Ireland	4 weeks in the spring vacation

* Students in the Faculty of Intercultural Communication who are admitted through an entrance exam for international students should participate in the Study Japan (SJ) Program instead of the SA Program.

**Faculty-specific study abroad systems and overseas training systems have respective scholarship systems (except the Short-term Study Abroad Program, Faculty of Social Sciences).

Tuition and fees

Tuition and fees for FY 2018 (Undergraduate Faculties)
