12:50 **Closing Remarks**

Since being chosen as a Top Global University in 2014, Hosei University has been committed to cultivating graduates who can thrive anywhere in the world through developing various programs, including, but not limited to, involving students in problem-solving fieldwork, establishing a new degree course in English, expanding the English Reinforcement Program (ERP) and study abroad programs, as well as increasing the intake of international students.

As we bring the Top Global University Project to a closure, we hold this symposium to deepen discussions on the qualities we should cultivate in our students in today's world and share the fruits of Hosei University's efforts as a Top Global University.

Professor Steven K. Vogel of the University of California, Berkeley, an expert on Japan who conducts research on international trade and labor markets, will give a keynote address. This will be followed by a panel discussion on desirable human resources in today's world from the perspectives of the university, NPO, and industry, as well as that of an alumnus of Hosei University.
